PROJECTS

Beam Budget

• A budgeting app that calculates a users financial health based on their income and expenses for the month. It is written in pure Javascript, HTML5 and CSS3.

Avion To Do App - *In-Progress*

• Currently building a To Do application using React.Js. I have used many apps and decided it would be fun and challenging to build one of my own.

WeatherFetch

• A weather app built using React.js that takes in a location and utilises the openweathermap.org API to fetch and display the current weather of the location.

Teslim Alabi's Portfolio

• Built a custom portfolio website for UX designer Teslim using HTML5, CSS3, jQuery and Javascript.

ACTIVITIES & AWARDS

• **People-to-People Leadership Program - Stanford University, CA.**   **August 2010**
• **International Merit Scholarship - University of Alberta, AB**   **Septmember 2010**
